

PRESENTATIONS

12:00

Understanding the Inflation Reduction Act

Hallie Bowie, New Leaf Home Design

Did you know the IRA makes rebates available for homeowners to purchase electric vehicles, energy efficient appliances, or other sustainable home upgrades at lower costs? Learn about eligible projects.

1:00

Rain Barrel Workshop*

Erica Matheny, Tinker's Creek Watershed Partners | Sandy Barbic, SSWCD

Rain barrels capture water from roofs and store it for use in gardens or lawns. They help conserve water, reduce storm water runoff, and mitigate flooding. Learn how you can save water - and money - by using a rain barrel.

*The workshop is free to observe. For a fee, you may purchase a barrel to assemble at the workshop. Pre-payment is required for barrel purchase. Register at: tinkerscreek.org/events/udson_rain

2:00

Composting at Home

Ben McMillan, Rubber City Reuse

Composting is a simple way to improve soil health, reduce green house gas emissions, and reduce dependence on chemical fertilizers. Learn how you can contribute to a healthier environment by composting at home.

3:00

Human Impacts on the Cuyahoga Valley

Barbara Gedeon, Josiah Lincoln Clouser Flower Farm

Learn more about the history of development near Hudson. Barbara Gedeon, a historian, specializes in the history of the Cuyahoga Valley and will discuss human impacts on the Valley.
