33. EBURY CIRCLE (PCI 62)
34. EBURY LANE (PCI 47)
35. YOUNG ROAD (PCI 39)

STREET SELECTION:

SUMMARY: STREETS SELECTED FOR RESURFACING ARE DUE TO A NUMBER OF CONSIDERATIONS, THE PRIMARY FACTOR BEING ITS ROAD CONDITION OR PAVEMENT CONDITION INDEX (PCI). THE PCI IS AN ASTM STANDARDIZED METHOD USED TO ESTABLISH A NUMERICAL RATING OF THE STREET. THE RATINGS RANGE FROM 0 TO 100 WITH 100 BEING THE BEST AND 0 BEING WORST CONDITION. THE RATINGS EVALUATES PAVEMENT DISTRESS INCLUDING CRACKING, POTHOLES, RUTTING, WEATHERING AND RIDE QUALITY, AMONGST OTHERS. OTHER FACTORS TO SELECT STREETS FOR PAVING INCLUDE AVERAGE DAILY TRAFFIC, PROXIMITY TO OTHER ROADS SCHEDULED FOR RESURFACING, BUDGET AND THE SCHEDULE OF OTHER CONSTRUCTION PROJECTS IN THE STREET.
